GRUPPO CONSIGLIO ®

IT Solutions & Consulting

America & Europe

ewafactory ®

Why *ewa* ®

"We make yours goals possible"

Our **company** is focused on providing high quality software solutions & consulting services.

Our **solutions** are based on "thinking out of the box", smart resource management & talented members, 10+ years of expertise.

Providing **consulting** is also a core business. We can help you improve your processes and assure compliance in every aspect of your company.

We base our solutions on operating units

- **Agile analysis**, creating value on solutions and products.
- **Design acceleration**, defining product and timelines for faster live release.
- **Product development**, building the right solution for every platform with world class UI/UX.
- **Quality by planning**, control and improvement process.
- **Live time**, solving project's unknowns without delays
- **Data & analytics**, for each project to provide effective conclusions

Each operating unit represents deep pockets of expertise which foster creativity and innovation while allowing us to build, enhance and consolidate the right solution around a variety of emerging technologies.

- Our solutions comply with market's requirements and certifications
- Custom development solutions
- We only want your company to succeed and we want to be part of that success!
- Prioritizing quality, therefore getting the best talent has become our purpose.

Quality, Service & Teamwork

Assuring coding quality

- Functional testing of each feature assures no "surprises".
- Code reviews on regular basis and by different developers.
- Hard testing of each line of code also eradicates chances of errors.
- Regression testing of each new code line assuring no side effects on the entire system

Let's talk about our team

- We have team members located all across Latin America, allowing total time zone availability for American and European customers.
- It's all about being multicultural, lean and fearless! We are an amazing group of talented people ready to work with you!

How do we recruit our talent?

- Online tests for assessing skills, IQ, personality and English proficiency.
- HR interviews.
- Online "real life" tests.
- Interview with Technical managers.
- Hiring and Project assignment

"Bull's-eyes process for getting the best developers in the market"
